

INTRODUCING
ComplyAI

Overcome the complexity
of food packaging regulation
with the click of a button.

Future Goods proprietary AI tool for tracking, analyzing, and generating forecasted regulation changes. Developed to help our QSR partners stay ahead of the legislative changes with simple, centralized real-time dashboards and remain compliant with product material analysis based on each restaurant location in your system.

Restaurant location-based ECO regulation tracking and analyzing

- Automated Future Goods product matching compliant products based on material analysis
- Immediate notification of potential regulation changes and impacted product compliance status

Generate real-time regulatory forecast identifying potential changes to existing regulations and alerting stores that are forecasted to have new ECO requirements soon

System Wide Regulation Status Tracking & Product Compliance

Group:
Customer Locations
